

Chapter 6, #8 – a.

```
package books;
public class Book {
    private String name;
    private float cost;

    public Book(String name, float cost) {
        this.name = name;
        this.cost = cost;
    }

    public String getName() {
        return name;
    }
    public float getCost() {
        return cost;
    }
}
```

Chapter 6, #8 – b.

```
package books;
public class TextBook extends Book {
    public TextBook(String name, float cost) {
        super(name, cost);
    }
}
```

Chapter 6, #8 – c.

```
package books;
public class Shopping {
    public static void main(String[] args) {
        TextBook myBook = new TextBook("Jav Programming", 100);
        System.out.println(myBook.getName());
        System.out.println(myBook.getCost());
    }
}
```
