

Chapter 8, #5 – Tuner Interface.

```
package Homework3.music;
public interface Tuner {
    void tune();
}
-----

package Homework3.music;
public class Radio implements Tuner {
    @Override
    public void tune() {
        System.out.println("Radio's sound is fake");
    }
}
-----

package Homework3.music;
public class Guitar implements Tuner{
    @Override
    public void tune() {
        System.out.println("Guitar's sound is real");
    }
}
-----

package Homework3.music;
public class Calculate {
    public static void main(String[] args) {
        Tuner radio = new Radio();
        Tuner guitar = new Guitar();
        radio.tune();
        guitar.tune();
    }
}
```
