All Classes

Country

public long getPopulation()
Method to get population of the country.
Returns:
the population of the country.

getCapital

public java.lang.String getCapital()
Method to get capital of the country.
Returns:
the capital of the country.

setName

public void setName(java.lang.String name)
Method to set name of the country.
Parameters:
name - the name of the country.

setPopulation

public void setPopulation(long population)
Method to set population of the country.
Parameters:
population - the population of the country.

setCapital

public void setCapital(java.lang.String capital)
Method to set capital of the country.
Parameters:
capital - the capital of the country.
